

Malaria Course in Tanzania - Focus on e-Learning

WHAT YOU CAN EXPECT

Participants will gain knowledge and skills to strengthen their competences in the fight against malaria in affected countries through an understanding of:

- Interventions on vectors
- Parasite biology
- Immunology and vaccines
- Diagnosis, drugs, treatment & pregnancy
- Non-malaria fevers
- Surveillance
- Health economics
- Elimination

WHO SHOULD ATTEND

This course is designed for individuals involved in malaria research or malaria control (health personnel, scientists and researchers, public health specialists and malaria control administrators). 16 participants from malaria-affected countries will be selected according to their profile, professional status, and letter of motivation and of recommendation. The minimum requirement is a BSc or Master degree, several years of professional experience and basic computer skills.

WHEN AND WHERE

September 25th to October 20th 2017, Bagamoyo, Tanzania.

Course registration fee per participant: USD 500.

Travel, accommodation and catering expenses will be sponsored by the organisers.
